**Fairwind Vermont seeks to create a fair and open discussion on the future of wind energy in Vermont's working landscape.**

**We hope to do so by:**

- Creating a local, state and regionally based citizen action organization that promotes the fair and logical development of wind energy as a part of our energy future.
- Distributing information to locally impacted communities about the need for and benefits of clean, sustainable and renewable energy sources at the local and State levels.
- Promoting appropriate siting of wind projects in an environmentally and socially responsible way.

**We invite you to join Fairwind Vermont and show your support for renewable wind energy in Vermont.**

**Your membership will help us demonstrate the widespread support that exists for viable renewable wind projects. Your donation (made out to Fairwind Vermont) is greatly appreciated.**
